PROJECT V.E.T.S.

healing THE PLANET ONE ANIMAL AT A TIME.

2013 ANNUAL REPORT

Project VETS 2013 Annual Report

Mission

We are dedicated to helping improve the health and welfare of animals around the globe. We achieve this goal by collecting veterinary equipment, technology and supplies (V.E.T.S.) from veterinary hospitals, veterinary colleges, zoological societies, human hospitals and medical equipment/supply manufacturers and distributing them worldwide to veterinarians working in nonprofit or non-governmental organizations devoted to animal health. In this way we not only help the animals of our planet, but we also conserve valuable resources that might otherwise end up in someone's storage facility or a landfill.

A Message from Candy Sayles Brad, DVM, Founder and President

I am constantly amazed by what one person can accomplish. Over the past five years I have had the pleasure to work with individuals all over the globe, driven by their passion, love of the earth and the animals who inhabit her. Often, these people come from humble beginnings and they work in areas of economic hardship. But they power through. They will not take "No" for an answer. They put one foot in front of the other until they find a way to reach their goals, drawing others to their mission. People like Emma Clifford who founded Animal Balance in 2004 with a desire to reduce human-animal conflict on island nations by decreasing the number of unsterilized/unvaccinated companion animals. Starting with one campaign in the Galapagos Islands, they are now running several campaigns a year on islands throughout the Pacific and Caribbean. And Pradeep Nath, Founder of VSPCA in Andhra Pradesh, India. Tirelessly working in his community since 1996 to help save endangered sea turtles as well as running a sanctuary for over 1300 dogs, cats, cows, water buffalo, birds, monkeys, horses, rabbits, tortoises, ducks and more!

In 2009, with no experience in the not-for-profit world, I started Project V.E.T.S. along with three good friends. We recognized these incredible individuals around the globe trying to improve animal health with little to nothing in the way of funding, equipment or supplies. Taking one day at a time, we started gathering veterinary supplies and matching them to the needs of veterinarians in the field. Today, we are proud of the fact that we have collected and distributed over \$200,000 worth of equipment, technology and supplies to animal related non-profits working in 34 countries.

This past year we added five new recipient organizations: ARKA, Evelyn Alexander Wildlife Rescue Center, Greenwood Wildlife Rehabilitation Center, Orangutan Foundation International and Watermelon Mountain Ranch Animal Shelter. These groups join the other 56 organizations we are currently supporting.

Five years ago I never could have dreamed how far we would travel, how many animals we would help to heal. The need is so great and we will continue to reach out to those individuals working to make a difference in their corner of the globe. What can you do? Get involved! Follow the examples of Emma and Pradeep, as well as the other visionaries in the world, and do not take "No" for an answer. The next time you find yourself asking: "What can I do? I am just one person and the problem is so big, I have no idea how to get involved", join with us. Because together we CAN heal the planet one animal at a time!

Cheers,

Candy

Where We Helped in 2013

Project V.E.T.S. sent out 72 shipments of supplies to 33 different organizations this year. A quick summary of this year's recipient organizations is below.

Animal Balance-Animal Balance believes that high volume, community based sterilization campaigns combined with rabies vaccination is the only humane, logical and sustainable strategy to combat the over population of cats and dogs and prevent the spread of rabies. Volunteer veterinarians, veterinary technicians, assistants and helpers come together to create MASH-style 'Mobile Animal Sterilization Clinics' on islands around the world. They currently work in the Bahamas, Cape Verde, Cuba, Dominican Republic, Galapagos Islands and Samoan Islands.

Animal-Kind International-Animal-Kind International-A U.S. based nonprofit founded by Karen Menzcer, AKI supports several animal welfare organizations worldwide by matching them with individuals and businesses in developed countries who can provide much needed supplies and monetary donations. We are currently matched with their partners: Animal Friends of Kosovo, Helping Hands for Hounds of Honduras, Lilongwe SPCA, Namibia SPCA, Save the Animals-Armenia, Sierra Leone AWS and Zimbabwe National SPCA.

ARKA-This Society for the Protection of Animals and the Environment in Serbia was founded in 1995, making it one of the oldest non-profits in Serbia. They are currently operating a Dog Shelter in Sremska Mitrovica and a Dancing Bear Sanctuary in the village of Banostor. Branka and Pavel Pasko are dedicated to improving the health and welfare of all animals in Serbia and are also working with Dr. Andrija Dakovic to establish a veterinary ambulance to provide low cost or free spay/neuter campaigns.

[Arkansas Native Plant and Wildlife Center](#)-Mena, Arkansas is the home to Tommy Young and his rehabilitation Center. Tommy has a degree in Ornithology from Cornell University and is a Federal and Arkansas State licensed wildlife rehabilitator. Working with Dr. Sandy Hatch and Veterinary Technician Corbert Deary, Tommy has successfully rehabilitated birds of prey, bear cubs, deer, fox, skunk and other native Arkansas species. For those animals that are not able to be released back into the wild, the center will provide lifelong care.

[AWARE Trust](#)-Dr. Keith Dutlow and Dr. Lisa Marabini are the motivation and work force behind this Zimbabwean conservation trust. Founded in 2004, AWARE Trust focuses on the welfare of wildlife and the conservation of wildlife habitats. They do this through rehabilitation of injured wild animals, prophylactic care of domesticated animals living in poverty-stricken areas interfacing with wildlife conservation areas, research and education.

[Belize Wildlife and Referral Clinic](#)-Co-founded by Dr. Isabelle Paquet-Durand and Justin Ford in 2011 to help care for wildlife that had been injured or orphaned. They are currently continuing their work in wildlife conservation while also reaching out to local communities to provide domestic animal veterinary care. BWRC is also an integral partner in promoting veterinary education and research throughout Belize.

[Chimpanzee Sanctuary Northwest](#)-In 2003, the CSNW was founded by Keith Lachappelle after learning about the plight of chimpanzees used in research and the entertainment field. Chimpanzees are incredibly intelligent beings and they share 98.76% of their genetic material with humans, making them our closet relatives on Earth. The first seven residents, dubbed the Cle Elum Seven, made their way to Washington State in 2008 from a biomedical research laboratory in Pennsylvania, where they were used for vaccine research and in a breeding program. Thanks to Keith, the CSNW board of directors, including veterinarian Mel Richardson, they now have a much better environment to call home.

[Dharamsala Animal Rescue](#)-Deb Jarrett founded Dharamsala Animal Rescue in 2009 after a trip to Dharamsala, India where she befriended an injured street dog named Tommy. He opened her eyes to the plight of many animals in India and the fact that over 50,000 human lives are lost every year to rabies. Since their inception, DAR has neutered and vaccinated over 1000 dogs and treated hundreds of dogs, cats, cows, donkeys, monkeys and birds for various illnesses. They are also working to educate the community about animal health and welfare and its relationship to human health.

[Evelyn Alexander Wildlife Rescue Center](#)-Located in Hampton Bays, NY, this wildlife rehabilitation center treats and rehabilitates over 2000 animals per year. They have a full time veterinary hospital built specifically for the treatment of wildlife and it is staffed 24 hours a day, 365 days a year. They also provide educational programs to the surrounding communities on human/wildlife interactions and provide internships to students from local colleges.

[Greenwood Wildlife Rehabilitation Center](#)-Located just outside Lyons, Colorado, this wildlife rehabilitation center was first started in 1982. It has now grown to be one of the largest wildlife rehabilitation centers along the Front Range, caring for over 2500 animals each year, most of these small mammals and birds. Dr. Alison Hazel and her staff, both paid and volunteer, provide professional care to sick, injured and orphaned wild animals so that they can be released back into their natural environments.

[Humane Society of Concord](#)-The mission of the Humane Society of Concord & Greater Cabarrus County, N. C. is to end animal suffering and cruelty, reduce overpopulation and educate the public regarding responsible animal ownership. This mission is accomplished by utilizing trained volunteers to investigate cruelty, supporting efforts to establish a low cost spay/neuter clinic for low income families and a sanctuary for homeless animals.

[Kitten Krazy](#)-A nonprofit organization located in Brunswick Hills, Ohio, Kitten Krazy is helping to decrease the kitten and cat overpopulation problem in their area by housing and re-homing abandoned animals. They are a small, volunteer organization that usually cares for healthy and well-socialized kittens under six pounds.

[Knysna Animal Welfare Society](#)-Dr. Kathleen Davis is the current on staff veterinarian for KAWS, but it has served the communities of Knysna and Sedgefield for over 60 years. KAWS offers low cost or free veterinary care for families in the area and holds numerous vaccination/sterilization clinics every year.

[Lakeside Spay and Neuter](#)-Like many shelters, Lakeside Spay and Neuter was founded by Diane Hazen and Gudrun Jones in response to the overwhelming street dog and cat population in Jalisco, Mexico. What started in 2001 as a rescue to provide shelter, sterilizations and vaccinations to this homeless pet population has now grown to include education about pet ownership as well as clinics to service the needs of pets with homes as well as those without. Helped by volunteer veterinarians like Bob Strand this rescue is significantly reducing pet overpopulation in Ajijic.

[Mazie's Mission](#)-Mazie's Mission was formed by Dr. Erin Shults to bring a self-sustaining, focused approach to animal welfare with the purpose of eliminating unnecessary euthanasia. This will be accomplished by providing professional medical care, expert forensic evidence and adoption assistance to shelters, rescue groups, first responders and other non-profit animal welfare groups. The ultimate goal of Mazie's Mission will be to establish a world class hospital and lifetime sanctuary for the care of those animals that cannot find a home.

[Mdzananda Animal Welfare Clinic](#) Located in Khayelitsha (near Cape Town), South Africa, this clinic provides low cost or free veterinary service for dogs and cats. They have been in operation for over 14 years and, through community support, have grown to a fully serviced veterinary facility working out of 6 recycled shipping containers. Dr. Edson Man'ombe and his staff also provide mobile services to the area.

[Mountain Gorilla Veterinary Project/Gorilla Doctors](#)-Led by Executive Director and veterinarian Mike Cranfield, this group was established in 1986 at the request of Diane Fossey. Their mission is to protect the remaining population of Mountain Gorillas in the Democratic Republic of Congo, Rwanda and Uganda. Their work is primarily done in the field, trekking to the gorillas in the mountainous rain forests. MGVP is also overseeing the care of three orphaned infant mountain gorillas and two Grauer's gorillas at Virunga National Park's Senkwekwe Center and one Grauer's gorilla at their orphan facility in Kinigi, Rwanda.

[Ngamba Island Chimpanzee Sanctuary](#)-Located on a 100 acre island in Lake Victoria just offshore from Entebbe, Uganda this Sanctuary is home to approximately 45 chimpanzees ranging from 2 to 25 years old. These chimps were orphaned when their mothers were killed, either for the bushmeat trade or for their babies, who could be stolen and sold on the black market.

[Orangutan Foundation International](#) -Originally founded by Dr. Birute Galdikas in 1971 and called the Orangutan Research and Conservation Project (ORCP), OFI is dedicated to the conservation of the remaining wild orangutan populations in Borneo and Sumatra. They are doing this through the promotion of research, education and forest protection. They are also responsible for the care of ex-captive orangutan orphans as they work to relocate them back into their indigenous forests.

[Pan African Sanctuary Alliance \(PASA\)](#)-PASA created its first sanctuary in 1974 and currently has 22 sanctuary members in 12 African countries. Ngamba Island Chimpanzee Sanctuary, one of our earliest recipient organizations, is a member of PASA. These sanctuaries are caring for more than 850 chimps, 85 gorillas and almost 3000 other endangered primates. Each facility has their own veterinarian or group of veterinarians and they are all working to support the conservation and care of African primates.

[People and Animal Welfare \(PAW\)/Casa de Orientacion y Desarrollo Real \(CODR\)](#)-PAW is community project of CODR, an organization in the Dominican Republic working to gain university education opportunities for students from poor backgrounds. Through PAW, the students are learning how to design and implement a program that will help vaccinate and sterilize the vast homeless companion animal population. They are working with Dr. Rafael Rodriguez to build a sustainable spay-neuter program through the development of an animal hospital. This will also allow Dominican veterinary students an opportunity to receive additional training.

[People For Animals-Faridabad](#)-Located in Faridabad, India, PFA is working to educate the community about the fair and ethical treatment of all animals. They are doing this by providing sterilization services, rabies vaccination/education and by providing a shelter for those animals rescued from the street and abusive situations.

[Refugio Cantalobos](#)-A companion animal shelter opened in 2013 by the Varela Walter family in response to the growing number of strays in Spain. This organization not only rescues dogs and cats living on the streets, but they vaccinate, sterilize and house them until they can find them a forever home-often in another country!

[Romania Animal Rescue](#)-On a hiking trip with friends in Romania in 2001, Nancy Janes was shocked by the thousands of stray dogs and cats roaming the streets. At that time the government was poisoning animals as a means of population control. It was difficult to find good veterinary care, let alone veterinary surgeons that were able to perform spays and neuters. She and her husband founded RAR in 2003. RAR established the first free spay/neuter program and to date have performed over 18,000 sterilization surgeries. They also offer no cost vaccinations, parasite control and general veterinary care. They have teamed up with Dr. Stefan Aurelian and the Romanian Animal Rescue Foundation to continue this great work!

[Saint Seton's Orphaned Animals](#)-By providing low cost veterinary care to middle and low income families, Saint Seton's is helping to keep more companion animals in their homes and helping to end economic euthanasia. They also provide affordable sterilization surgeries to the community and other animal non-profits.

[Soi Dog](#)-In 2003, Gill and John Dailey joined forces with Margot Homburg Park in Phuket, Thailand to help control the burgeoning stray dog and cat population. Since then, through many obstacles, including Gill almost losing her life, they have sterilized almost 30,000 animals and established a shelter where they provide ongoing care for injured/abused animals and a temporary home until they can be placed in permanent homes, locally and abroad.

[Soul Dog](#)-This all volunteer, 501(c)3 organization works in Colorado and surrounding states to provide low cost veterinary care to areas where it is not readily accessible. With their mobile spay/neuter clinic they visit Indian Reservations, rural communities and inner cities. They also have an adoption program for those animals treated who do not already have homes.

[Students for International Veterinary Opportunities](#)-A group of students and veterinarians at the University of Florida College of Veterinary Medicine founded this nonprofit to provide basic veterinary care to communities located outside of the U.S.. They currently hold an annual three day veterinary clinic in Roatan, Honduras at no cost to island residents.

[Tanzania Animal Welfare Society](#)-Founded in April of 2008, TAWESO has already been making a huge impact on the way people in Tanzania view and treat domestic and wild animals. As one of their first projects, they spent over a year working with the Tanzanian Government to draft and pass the Animal Welfare Act of 2008. Executive Director, Dr. Thomas Kahema, and his volunteer staff are presently working out of a small shelter in Dar es Salaam, providing veterinary care to primarily dogs and cats, while educating the community about animal care and zoonotic diseases. They also have implemented a donkey welfare project in Dodoma.

[The Big Fix Uganda](#)-Since 2012, this nonprofit has been working in northern Uganda to help improve human and animal health and welfare. They are doing this through sterilization and vaccination clinics, general veterinary care, animal welfare education and animal cruelty education.

[Tree of Life for Animals](#)-A nonprofit founded in 2005 in Rajasthan, India, TOLFA is working to improve animal health through sterilization, vaccination and education. They run a free veterinary hospital 365 days a year and offer care and sanctuary to all species of animals that cannot be returned to their original environment. They even have an animal ambulance that can respond to emergencies!

[Tsunami Animal-People Alliance](#)--In 2004 a devastating Tsunami swept through Sri Lanka, leaving thousands of people and animals displaced. Because of this displacement, as well as the lack of food and water, the threat of rabies soared. Local NGO's and independent animal welfare activists joined together in March of 2005 to form what has become TAPA. Their field sterilization clinic travels within the tsunami disaster zone and refugee camps providing veterinary care, rabies vaccination and sterilization to community owned animals, privately owned animals and strays. To date they have performed over 25,000 sterilization surgeries and have improved the human-animal bond!

[Veterinarians Without Borders-US](#)-Working in underserved areas of the globe to improve veterinary care. Dr. Thomas Graham, CEO and Dr. Julie Hunt, Director are currently focusing VWB energies in Liberia, West Africa. They are teaching the local population how to provide essential veterinary care for their livestock and are teaching local, college educated students basic laboratory medicine. This will provide much needed surveillance for emerging animal and zoonotic diseases.

[VIDAS](#)-This non-profit organization was created to improve animal health and welfare in some of the poorest areas of the world. VIDAS currently funds 2-3 free clinics per year in Mexico for vaccination, safe sterilization and parasite control in cats and dogs. They also are educating the communities about safe animal handling, zoonotic diseases and general animal husbandry. To date they have sterilized nearly 10,300 dogs and cats!

[Victoria Falls Wildlife Trust](#) (formerly Wild Horizons Wildlife Trust)-This Zimbabwe based, wildlife trust is run by Jessica Dawson and her husband Roger Parry. They have been in operation for 5 years and, together with veterinarian Dr. Chris Foggin, are working to rescue and rehabilitate wildlife injured or orphaned by human interference. Their wildlife laboratory and clinic is the only one in the KAZA 5 countries region and is important not only for rehabilitation but also for disease surveillance.

[Visakha Society for Protection and Care of Animals](#)-Located in Andhra Pradesh, India, the VSPCA is a sanctuary for dogs, cats, cows, horses, buffalo, birds, turtles and other small animals. VSPCA started in 1996 in the city of Visahapatnam. They work primarily here and the surrounding areas, although as the numbers of animals needing treatment increase, they are branching out into to several other districts in Andhra Pradesh.

[Watermelon Mountain Ranch](#)-This No-Kill facility located in New Mexico was the dream of Sophia and Lee DiClemente. Since their establishment in 1996, they have adopted out over 20,000 animals. Their goal is to reduce pet over population through education.

[Wildlife SOS](#)-Working to preserve India's vast wildlife and forests since 1995. Wildlife SOS has a multi-tiered approach to wildlife and habitat conservation which includes: rescue of injured or exploited animals, anti-poaching, education, research, habitat protection, reducing human/wildlife conflict and tribal rehabilitation.

A Few Testimonials from 2013

Ape Action Africa (a PASA Sanctuary)-Cameroon

"Hey, it's from Project VETS! Wow, those guys..."

These were the immediate words from Babs as the first suitcase was opened. He only had to see the logo on the letterhead at a glance to know it was from you. We filled up an entire dresser and multiple table tops with the precious cargo. He and the director are in the process of inventorying everything now.

I know I've said it before, but what Project VETS does for Ape Action is so very special and every single item is so very much appreciated. Thank you from Babs, and from me, again and hugely, for everything you guys do.

*Best,
Susan*

Chimpanzee Sanctuary Northwest-United States

Dear Candy,

I just wanted to let you know that we received our new laryngoscope set and IV fluid pump from apexx and Project V.E.T.S. Thank you!

For the past nine months, we have been working to create an on-site veterinary clinic for the seven chimpanzees in our care. After living for decades in small cages in research laboratories, these chimpanzees deserve nothing less than the best care possible at their new sanctuary home. We have an amazing team of veterinarians who generously volunteer their services, and now, thanks in large part to apexx and Project V.E.T.S, they will have all the equipment they need right here at the sanctuary.

On behalf of Annie, Burrito, Foxie, Jamie, Jody, Missy, and Negra, we thank you and apexx for your support.

*Sincerely,
J.B. Mulcahy
Director of Operations
Chimpanzee Sanctuary Northwest*

Mdzananda Animal Clinic-South Africa

Project V.E.T.S. (Veterinary Equipment, Technology and Supplies) thank you so much for the huge box of various supplies that we received from you - it was so full of wonderful surprises. Blessings, our new grad vet, enjoyed sorting it out. Almost felt for us like being children again - enjoying all the new and unfamiliar items that were in the parcel. THANKS!!!!!! IT ALL LOOKS FANTASTIC!!!! Mdzananda Animal Clinic 8/24/13

Financial Report - 2013 “Reach More Animals”

- Claire Campbell, Board Chair

Project V.E.T.S. operates with just a 7% overhead which means that **93 cents of every donation is invested directly toward our recipient organizations.**

“Program” includes value of donated items shipped, equipment repair costs, retired inventory and costs of shipping to our recipients.

**“Other” includes legal, accounting, office expenses, payroll, advertising and fundraising.

In last year’s Financial Report I ended by stating “Our plan for 2013 is to focus on increasing supply donations and shipments to reach even more recipient groups”. I’m pleased to report that we both greatly exceeded that goal, and retained a strong cash position. In addition our program efficiency increased from 91% to 93%.

We received over **100 donations** of supplies with an estimated value of over **\$75,000**. With a goal to reduce our year end retained supplies, we helped a record number of animals worldwide by sending out **72 Shipments** to 33 different non-profit organizations with a total value of over **\$80,000**. (Up from 36 shipments with a value of over \$44,000 in 2012!)

Our grant awards have continued to increase, up from \$5,500 last year to \$9,500 this year. We are optimistic that this trend will continue.

A decision was made this year by the Board of Directors to begin a fund drive for the hiring a Development Director. At the end of 2013, through a combination of individual donations and fundraisers, we have managed to earmark approximately \$13,000 for that position. Our hope is that through the continued support of our donors and grantors, we will be able to fill that role, part-time, in 2014.

Note: This financial report is based on un-audited financial statements, though every care has been taken to ensure they are accurate.

SUMMARY STATEMENT OF ACTIVITIES

	2013	2012
Support, Revenue and Other Gains		
Contributions – individual and business donors	\$10,975	\$7,048
Contributions – grants	\$9,500	\$5,500
Special Events and other income, net	\$3,898	\$1,123
Total Cash Support	\$24,373	\$13,671
Contributions – non-cash (supplies and equipment)	\$75,433	\$51,979
Reconciled Inventory / Value Update	\$8,114	
Total Support, Revenue and Other Gains	\$107,920	\$65,650
Expenses		
Program – equipment disbursed and retired + shipping	\$103,446	\$54,973
General and Administrative	\$6,780	\$3,125
Fundraising/Advertising	\$676	\$2,220
Total Expenses	\$110,902	\$60,318
Changes in Net Assets – see Note 1 below	–\$2,982	\$5,332
Net Assets at Beginning of Year	\$54,778	\$49,446
Net Assets at End of Year	\$51,796	\$54,778

*Note 1 : The negative change in Net Assets is attributed to a planned decrease in retained supplies from 2012.

DONOR TYPE CONTRIBUTIONS

STATEMENT OF FINANCIAL POSITION

	2013	2012	2011

Ways YOU Can Help!

MAKE A FINANCIAL GIFT... to Project V.E.T.S. to help fund the delivery of desperately needed supplies and equipment to veterinarians working with non-profits worldwide.

DONATE supplies... Right now, animals around the world are waiting to receive needed care. Donations of your new, unused or gently used veterinary and medical supplies and equipment can be the difference between life and death. Please visit our website www.projectvets.org for a list of the most immediate needs.

SPONSOR a box... Project V.E.T.S. receives so many requests for veterinary assistance each year. Many of those needs are still waiting to be met due to lack of funding for shipping and transportation costs.

SPREAD THE WORD... tell others in your network and community about our work. Connect with us on Facebook and follow us on Twitter -

<https://www.facebook.com/pages/Project-VETS-Veterinary-Equipment-Technology-and-Supplies/88510373715>

<https://twitter.com/#!/projectvets>
